

PROFESSIONAL SUMMARY

Full Stack Engineer with strong expertise in Node.js, React.js, and AI-powered systems, focused on building scalable, production-grade applications. Experienced in designing microservices architectures, developing high-performance REST APIs, and integrating machine learning models into real-world workflows. Proficient in cloud-native development using Docker, Kubernetes, and AWS (Certified Solutions Architect, Cloud Practitioner), with a strong emphasis on system design, performance optimization, and intelligent automation

SKILLS SUMMARY

- **Languages:** JavaScript, Python, Java, SQL, C, HTML
- **Frontend :** React.js, Tailwind CSS, Bootstrap
- **backend:** Node.js, Express.js, FastAPI
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis
- **Cloud & DevOps :** Docker, AWS, GitHub Actions, CI/CD
- **Tools :** GitHub, Postman, Nodemon
- **Core Concepts :** Microservices, REST APIs, Scalable Systems, Cloud-Native Architectures

WORK EXPERIENCE

FULL STACK DEVELOPER INTERN | APPLIFILES TECHNOLOGY SOLUTIONS

JUN 2025 - JUL 2025

Node.js, Express, MongoDB, Redis | [LINK](#)

- Built a scalable event management platform for 6+ institutional clubs with RBAC and JWT-based authentication. Optimized performance using Redis caching and query tuning, improving response time and system efficiency.

CampusOS | (FREELANCE)

OCT 2025 - DEC 2027

Next.js, Node.js, PostgreSQL, Redis, GROQ LLaMA | [LINK](#)

- Built an AI-powered full-stack platform with RBAC, JWT authentication, and automated campus workflows. Architected scalable backend services and integrated LLaMA-based AI for complaint classification and notification summarization.

PROJECTS

CLOUDSHELL LAB | Redis, MongoDB, Docker, Kubernetes, DevOps

Backend Developer | [LINK](#)

- Architected a cloud-native platform to provision ephemeral browser-based development environments using Docker and Kubernetes. Implemented automated container orchestration and lifecycle management, enabling scalable, isolated environments for real-time DevOps practice. Designed infrastructure for multi-user concurrency, improving system scalability and resource efficiency.

PRISM AI - AI DATA CLEANING AGENT | FastAPI, React, PostgreSQL, Celery, Redis, Docker

Full Stack Developer, AI Integraion | [LINK](#)

- Built a production-grade AutoML platform with agent-driven pipelines for data preprocessing, model training, and deployment. Designed intelligent preprocessing with dynamic decision-making and zero-leakage pipelines. Enabled real-time WebSocket logging and versioned dataset lineage for reliable, transparent ML workflows.

AWG ATMOSPHERIC WATER GENERATOR | IoT, Python, TinyML, Arduino, Sensors, Data Analytics

Backend Developer, ML Integration | [LINK](#)

- Developed an atmospheric water generator using Peltier cooling, producing 2-3 liters of water daily. Implemented real-time temperature and humidity monitoring using DHT11 sensors with Python-based data processing. Applied TinyML-based predictive analysis to optimize water generation by forecasting environmental conditions.

ACHIEVEMENTS & CERTIFICATES

- Solved 100+ problems on [LeetCode](#) focusing on Data Structures and Algorithms
 - Secured 75% (Elite) in [NPTEL](#) "Introduction to Industry 4.0 and Industrial IoT" certification.
 - **RHCSA (Red Hat) | 2025 | [LINK](#)**
- **Deloitte Tech Simulation (Forage) | 2025 | [LINK](#)**
 - **AWS Certified Cloud Practitioner | 2026 | [LINK](#)**
 - **AWS Certified Solutions Architect – Associate | 2026 | [LINK](#)**

EDUCATION

KPR Institute of Engineering Technology

Bachelor of Computer Science and Engineering; CGPA: 8.3

Coimbatore, India

Sep 2023 - Jul 2027
